

MOHAMMAD ADEL AL-BOHISI

Senior Back-end Developer (Laravel Specialist) 📍 Deir al-Balah, Gaza, Palestine 📞
+970598595579 | ✉️ mohammadalbohisi@gmail.com

PROFESSIONAL SUMMARY

A robust Back-end Developer with **4+ years** of professional experience (since 2021). Expert in building high-performance **RESTful APIs** and complex web systems using **Laravel**. Proven expertise in Cross-functional Collaboration, working closely with **React** and **Flutter** developers to ensure seamless API integration. Specialized in writing **Clean Code**, system analysis, and managing data-intensive applications for international and local markets including Saudi Arabia, Egypt, and Palestine.

TECHNICAL SKILLS

- **Back-end Development:** PHP (Expert), Laravel Framework (Advanced), OOP, SOLID Principles, Clean Code.
- **API & Integration:** RESTful API Design, JSON, Postman Documentation, Authentication (Sanctum/Passport).
- **Collaboration:** Git/GitHub, Seamless Integration with React.js & Flutter Teams.
- **Database Management:** MySQL, Database Analysis & Optimization, Complex Querying, Beekeeper Studio, MySQL Workbench.
- **Advanced Logic:** Cron Jobs, Multi-step Authentication (OTP), System Analysis & Architecture.
- **UI/UX Awareness:** Ability to analyze and translate designs from **Figma** and **Adobe XD** into functional Back-end structures.
- **Deployment:** Local Servers (WAMP/XAMPP), Server Management, and Project Launching.

PROFESSIONAL EXPERIENCE

Back-end Developer | Tawafuq Association (Saudi Arabia) 2021 – 2023

- Developed **Solh & Shaml** systems for family reform and dispute resolution.
- Built and maintained secure APIs to connect legal reformers with users.
- **Collaboration:** Provided full API support for the Flutter mobile team to ensure real-time data sync.

Lead Back-end Developer | Tomouh Company (Gaza) 2021 – 2023

- Architected the back-end for corporate management platforms currently in use.

- **React Integration:** Collaborated with React.js developers to build high-speed, dynamic dashboards.

Back-end Developer | Taswq Platform (Egypt) *Project-based*

- Designed a multi-vendor e-commerce system with advanced Admin and Store panels.
 - Implemented automated notifications and logic using **Cron Jobs**.
 - Delivered clean API documentation for mobile and web front-end teams.
-

KEY PROJECTS

- **Arzaq (Auctions):** A sophisticated bidding system for the agricultural sector with time-bound sessions and wallet balance validation.
 - **Lega Sport:** A sports management API powering a mobile app for Saudi sports academies, featuring scouting and ad modules.
 - **Caller Authenticator:** A high-security authentication system using time-sensitive codes (5-minute expiry) with admin approval workflows.
 - **Alduthur:** A financial services system for currency exchange and Western Union transfers with request tracking.
 - **KaskoWorld Store:** An e-commerce engine supporting unlimited nested categories and advanced filtering.
-

EDUCATION

Bachelor of Information Technology – Multimedia University of Palestine

CORE COMPETENCIES

- **Technical Collaboration:** Expert in bridging the gap between back-end logic and front-end requirements (React & Flutter).
- **Clean Code Architect:** Committed to SOLID principles for scalable and maintainable code.
- **System Analysis:** Skilled at transforming complex business needs into efficient database schemas.
